1. Comment. Soviet military supply traffic in the Cottbus railroad district. It tends to indicate that 2,104 cars were made available in the Cottbus district for Soviet shipments in June; 1,135 cars alone for coal shipments. Of the other 1,269 cars, some were probably used as troop trains. Military supply traffic there is presumably on the same level with that in other railroad districts. It is believed that the present report fails to cover all supply shipments during the period of observation as, for instance, it does not contain outgoing shipments from the Hohenleipisch ammunition depot and fuel depot at Strassgraebchen-Bernsdorf.

2. Comment. Major Leordin (fnu) is reported for the first time.
